## **PROJECTS**

### **CHOOSE YOUR FATE**

- This project was performed in my computer science class.
- We had the opportunity to come up with our own project to present to the class at the end of the semester.
- Each team had roles such as project manager/facilitator, planner, requirements (making sure we have everything for the project), design, development, tester, and presenter.
- When working on this project I had to role of a project manager.
- What I had to do is assign roles to my team and make sure everyone is doing what they are supposed to.
- This project took approximately took 2-3 months
